EDUCATION

• National Institute of Technology, Agartala

Bachelors Of Technology in Electrical Engineering

Dec 2021-May 2025

CGPA: 8.12/10.00

EXPERIENCE

• Infosys Ltd.

Digital Specialist Engineer

Sept 2025 - March 2026

Hyderabad

- Worked on the Execution tab development for an internal Gen-AI assurance platform.
- Built UI for an airline client to interact with 4 to 5 AI agents on a single platform.
- Integrated agents via MCP server endpoints, enabling frontend-triggered execution with input parameters.
- Implemented agent-to-agent flow in which the output of one agent is parsed and reused as input for the next step.
- Enabled user-driven workflows where users can review, modify, and trigger subsequent agents based on previous outputs.

• OneLot

Software Engineer Intern

July 2025 – Sept 2025

Remote, Philippines

- Designed and Implemented a Discount Type feature (DB layer -> model layer -> service layer -> API layer -> UI) to categorize loans based on discount type, enabling the credit team to efficiently label and assess loans.
- Contributed with Senior Software Engineer to provide API and Service layer support for Backend implementation of digital Appraisal score calculation feature.
- Optimized SEO and improved the health score from 78 to 95 by adding canonical URLs for duplicate pages, resolving slow page issues by optimizing typescript code, addressing orphan page issues, and following SEO aligned practices.

TECHNICAL SKILLS AND INTERESTS

Languages:	C++, Java, Python, basic SQL
Technologies:	React/Nextjs, Typescript, AI agents, Gen AI, Mysql
CS Fundamentals:	Data Structure And Algorithm, OOPS, DBMS, System Design
Developer Tools:	Cursor, Codex, Flowise ai, Github copilot, Visual Studio
Area of Interest:	Software Development, AI/ML, Agentic AI

PERSONAL PROJECTS

• CreditMatch AI

AI Agent for Credit Card Eligibility and Recommendation

- **Tools & Technologies:** Generative AI, LangChain, LlamaIndex, Flowise, Azure OpenAI, RAG Architecture
- Built an AI agent to evaluate credit card eligibility using inputs like CIBIL score, income, and age.
- Implemented Retrieval-Augmented Generation (RAG) to retrieve policy data and improve response accuracy.
- Integrated LLM workflows using LangChain and LlamaIndex for intelligent query processing.
- Designed automated agent pipelines in Flowise for eligibility analysis and recommendation generation.

• Daily Activity Tracker | [Github](#)

Chrome Extension with AI-Based Browsing Analytics and Reporting

- **Tools & Technologies:** JavaScript, Chrome Extension API, Manifest V3, Node.js, Express.js, REST APIs, Groq API, Telegram Bot API, Chart.js
- Developed a Chrome extension to track browsing activity and measure time spent on websites using background services, tab events, and idle detection.
- Built popup and dashboard interfaces to visualize daily activity, per-site usage, weekly trends, and productivity insights.
- Designed and integrated REST API endpoints in Node.js and Express.js to sync activity data, generate AI-based summaries, and manage report delivery.
- Implemented LLM-powered activity summarization with Groq API and integrated Telegram Bot API for real-time summary sharing and reporting.

ACHIEVEMENTS

- Secured **6th** Rank among 5lakh Students in Naukari Campus Young Turks sponsored by Siemens
- Solved **700+** problems on including all platforms like Codeforces, Leetcode, GFG, CodeChef, etc.
- **Global Rank 355** in Leetcode Biweekly Contest 140.
- Solved **300+** questions on Leetcode. Handle: [brajendrakaurav472](#)
- Solved **200+** questions on CodeForces. Handle: [bkaurav](#)
